SUMMARY

Master of Information Technology student at the University of Auckland with hands-on experience in full-stack development, back-end engineering, REST APIs, automated testing, and data-driven applications. Built production-style projects using Java, Spring Boot, Node.js, Express, Vue 3, SvelteKit, SQL, Docker, and modern testing frameworks. Strong in problem solving, software quality, and collaborative Git workflows, with a particular interest in AI-assisted development and building reliable, user-focused software.

TECHNICAL SKILLS

Programming Languages: Python, Java, JavaScript, SQL, R, HTML, CSS

Back-End Development: Node.js, Express, Spring Boot, Spring MVC, REST APIs, JPA, JWT authentication

Front-End Development: Vue 3, SvelteKit, Vite

Databases: MySQL, SQLite, H2, data modelling, CRUD operations, parameterised SQL

Testing and DevOps: Vitest, Supertest, Playwright, JUnit, continuous integration, Git, GitHub, Docker, Maven

AI and Data: Machine Learning, Regression, Logistic Regression, K-Means Clustering, Data Cleaning, Data Visualisation, Pandas, NumPy, Scikit-learn

Business Tools: Excel, Shopify

EXPERIENCE

ME RESPITE

Nov 2025 – Apr 2026

Technical Administrator (Volunteer)

- Managed product listings, catalogue data, and online sales reporting for a multi-location Shopify store, helping maintain accurate product and inventory information.
- Analysed store performance and inventory data to identify inconsistencies and support more reliable operational reporting.
- Updated storefront content and digital merchandising to improve product presentation, customer engagement, and the overall online shopping experience.

PROJECTS

ZanyTalk Social Forum

2026

Full-Stack Team Project (Back-End & Testing)

Node.js, Express, SQLite, SvelteKit, Vitest, Supertest, Playwright

- Designed the relational database schema and REST API contract for a five-person full-stack social forum, then implemented most of the Node.js and Express back-end.
- Built cookie-based authentication and session management using bcryptjs, httpOnly cookies, and Bearer tokens, with parameterised SQL and server-side ownership checks.
- Developed REST endpoints for user profiles and post management, including image upload functionality.
- Wrote API tests with Vitest and Supertest and end-to-end tests with Playwright, with continuous integration running on every pull request.
- Built the Java Swing administration client login interface and layout, added JUnit tests, and collaborated through Git feature branches and pull-request reviews.

NovaCart Multi-Merchant Ecommerce Platform

2026

Full-Stack Web Application

Java, Spring Boot, Vue 3, MySQL, Docker

- Built a production-style ecommerce platform that allows merchants to create, customise, manage, and publish online stores.
- Developed Spring Boot REST APIs with MySQL persistence, JPA entities, DTO validation, service-layer logic, and JWT-protected administration features.
- Implemented merchant onboarding, dashboards, product and inventory management, order workflows, promotions, analytics, and generated storefront routes using Vue 3.
- Organised the project into separate back-end, front-end, documentation, and Docker components with clear development guidance.

Video Game Sales Machine Learning Analysis

2025

Machine Learning and Data Analysis Project

Python, Pandas, Scikit-learn, Jupyter Notebook

- Built a reusable Python workflow to analyse video game sales performance using Pandas, Scikit-learn, and Jupyter Notebook.
- Cleaned and validated more than 6,000 records, handled missing values, and produced reusable analysis outputs.
- Applied linear regression, logistic regression, KNN regression, and K-Means clustering to investigate sales patterns and business insights.
- Exported charts, model metrics, cluster tables, and Markdown reports to communicate findings clearly.

EDUCATION

University of Auckland

Auckland, New Zealand

Master of Information Technology

Feb 2026 – Present

Focus: AI and Software Development | **Expected completion:** 2027

University of Auckland

Auckland, New Zealand

Bachelor of Commerce in Business Analytics

Jul 2022 – May 2026
